

Drug Overview

What is PT 141? PT-141, which is also called Bremelanotide, is a peptide developed from the hormone Melanotan II. It promotes sexual function in both men and women via interaction with the hypothalamus.

For women, PT-141 has been shown to treat hypoactive sexual desire disorder (HSDD) in premenopausal women. Those with HSDD are women who have reduced sexual desire that can cause personal distress or issues in their intimate relationships.

In men, PT-141 may also help with desire, as well as some forms of erectile dysfunction, not associated with circulation issues. PT-141 targets the part of the brain that regulates sexual response.

Benefits of Added B12:

B12 deficiency can result in symptoms like fatigue, low energy, and low stamina. With these symptoms, those deficient in B12 may also experience reduced sexual desire that can further complicate or add to personal distress in intimate relationships.

PT-141 may help with the following in both men and women:

- Increased libido
- Elevated sexual gratification
- Increased sexual energy and desire
- Mood enhancement

Recommended Use:

- Recommended for administration 45 minutes before sexual activity.
- Effect of PT-141 therapy may last up to 24 hours
- May be used with penile injection therapy

Routes of Administration:

- Oral, one (1) Rapid Dissolve Tablet (RDT)
- Subcutaneous Injection- Reconstitute with 4mls. Dose at 0.5ml's (yields 8 doses of PT- 141 2mg/ Methylcobalamin B12 0.5mg)

Men's Dosage Forms & Strengths

- RDT (Rapid Dissolve Tablet)- Tadalafil 5mg/ Oxytocin 100iu/PT 141 1,000mcg (light green color)
- RDT (Rapid Dissolve Tablet)- Tadalafil 20mg/ Oxytocin 100iu/PT 141 2,000mcg (light green color)
- Lyophilized Vial w/ Bacteriostatic Water (patient specific only) - PT-141 16mg, Methylcobalamin B12 4mg (Subcutaneous Injection)

Women's Dosage Forms & Strengths

- RDT (Rapid Dissolve Tablet)- 2.5mg/Oxytocin 100iu/ PT 141 1,000mcg (Lilac color)
- RDT (Rapid Dissolve Tablet)- 10mg/Oxytocin 100iu/ PT 141 2,000mcg (Lilac color)
- Lyophilized Vial w/ Bacteriostatic Water (patient specific only)- PT-141 16mg/Methylcobalamin B12 4mg (Subcutaneous Injection)
